LANGUAGES

English Hindi

I am a Front-End Developer Working on making responsive web applications using React, JavaScript , HTML and CSS.I aspire to learn and grow something new every day in front-end technologies .

PROJECTS

Mail Chat Box

(User Specific)

- Mailbox client is an application where users can send and receive mail. Each user has their own account and users cannot access other users data
- Frontend used HTML, CSS, Javascript, React, Redux and Bootstrap
- Implemented GET/POST/PUT requests to firebase in order to retrieve user-specific information for each user.

E-commerce Store

(With Firebase Authentication)

- E-commerce website is an application that gives users the option to see different products and add them to the cart, manipulating cart data.
- User needs to log in to access their cart and users can see the product details as well.
- Used Firebase for authentication and Real-time data for storage

🔗 <https://e-commerce-ruby-iota.vercel.app/>

Expense Tracker

(RealTime Database)

- Expense Tracker allows user to track their expenses and premium users can download their expense and change theme feature.
- Implemented firebase realtime data to manage data at backend.
